

Goal of the App

To connect students with job and internship opportunities, as well as with other users who can provide advice and assistance in their search. Along with this, it should also help connect employers and recruiters with prospective students, and engage with them in a more casual manner.

Features List

- Student and Employer specific sections
- Dashboard interface
- Estimating learning process system
- Auto-scheduling functions
- Users virtual profile that others can view
- Forums to engage with other users
- Customized interface to match the user with what they are looking for
- Ability to have meetings with other users on the app, using the camera or just voice calling

Solution Sketches

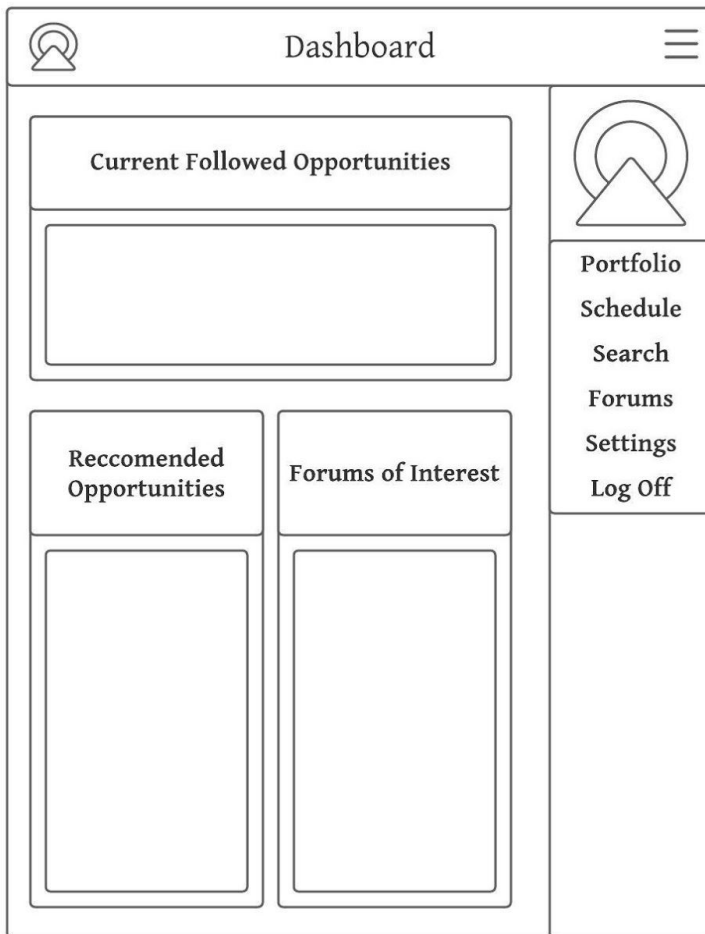

Dashboard

This feature is intended to provide a brief overview the main features utilized on the application, and to provide easy access to the various other parts of the app. It is also meant to condense many of the other parts of the app into a smaller, easy to understand sections, from which the more in-depth pages can be accessed.

Notes

- The top of this dashboard provides the most easy access to all other pages, but loses some of it's individuality
- This design focuses on function rather than style, but does have it's won features, such as the current opportunities list, the forums, and the settings
- Many of the features on this design would be apart of the mini-menu located in the top-left, and thus is more of an directory page to reach other pages easily

Dashboard

This feature is intended to provide a brief overview the main features utilized on the application, and to provide easy access to the various other parts of the app. It is also meant to condense many of the other parts of the app into a smaller, easy to understand sections, from which the more in-depth pages can be accessed.

Notes

- This design provides a basic styled overview of many of the apps commonly used features
- Opportunites and forums are the main interests on the page, with access to other pages on the left side of the dashboard
- It retains it's own style, but does not become to stylized in order to retain it's functionality, though it can appear basic

Dashboard

User Name

User Title

Upcoming Schedule Dates

Dashboard

This feature is intended to provide a brief overview the main features utilized on the application, and to provide easy access to the various other parts of the app. It is also meant to condense many of the other parts of the app into a smaller, easy to understand sections, from which the more in-depth pages can be accessed.

Notes

- The most stylized dashboard, but also has many of it's own features
- The top of the dashboard displays the users image, their name, and their title
- The mid-section has the opportunities, and forums, but also includes upcoming important dates to the user
- It's style begins to become more fun than minimalist, but it still retains it's functionality
